Player Management System

Status Report 3

Seth Friman, Sophie Lefebvre, Grace
Michael, Tara Sawhney, Jason Stitt

Accomplishments and Updates

Since last Status Report:

- Random Pitcher Generator

- Stats weighted

- Updated player data (positions and pitcher handedness)

- Keeping data in csv files (Samar asked)

- Lineup generator in progress

Outstanding Items

- Data cleaning

  - We thought this was finished, but errors in our data keep appearing when trying to generate lineups

- Lineup generator

  - Code is mostly finalized; data is causing issues

Current Challenges

- Data Management

    - Duplicates in rosters; inconsistencies (missing handedness, missing positions, etc.)

- Will we be able to finish in time?

    - Might not get to comparison of real rosters

- Current end goal

    - Returning weighted and realistic game lineups for our generated games
